INTERNATIONAL JOURNAL OF CIRCUIT THEORY AND APPLICATIONS, VOL. 26, iii–vi (1998)

CONTENTS

Volume 26, Issue Nos 1–6

International Journal of
CIRCUIT THEORY AND APPLICATIONS

Issue No. 1, January–February 1998

The Realization of Inverse System for Circuits Containing Nullors with Applications in Chaos Synchronization: A. Leuciuc 1

The Differences Between Cellular Neural Network Based and Fuzzy Cellular Neural Network Based Mathematical Morphological Operations: T. Yang, C. M. Yang and L. B. Yang 13

Simple and Accurate Non-Linear Current Conveyor Macromodel Suitable for Simulation of Active Filters using CCIIs: N. Tarim, B. Yenen and H. Kuntman 27

On the Periodic Solution of the Van Der Pol Equation for Small Values of the Damping Parameter: A. Buonomo. 39

On Concurrent Multiple Error Diagnosability in Linear Analog Circuits Using Continuous Checksum: Y. Zhou, M. W. T. Wong and Y. Min 53

Separability and Reducibility Criteria of RLC Networks over F_z and Their Applications: K. Lu and K. Lu 65

An Efficient Interval Method for Global Analysis of Non-Linear Restrictive Circuits: L. V. Kolev 81

Fault Macromodel for Switches in Switched-Current Circuits: C. Wang and C. Wey 93

Design of Perfect Reconstruction Filter Banks Using Transformation of Variables and Refactorization: D. B. H. Tay 103

Issue No. 2, March–April 1998

Analysis of Time-Varying Cellular Neural Networks for Quadratic Global Optimization: M. Gilli, P. P. Civalleri, T. Roska and L. O. Chua 109

Bifurcations in Current-Programmed DC/DC Buck Switching Regulators–Conjecturing a Universal Bifurcation Path: W. C. Chan and C. K. Tse. 127

A Thermodynamical Approach to Noise in Nonlinear Networks: L. Weiss and W. Mathis . . . 147

Indexed or abstracted by Cambridge Scientific Abstracts, CC/Eng, Tech & Applied Sciences, Engineering Index Inc., INSPEC, Research Alert, SCISEARCH DDatabase, Zentralblatt für Mathematik

On the Representation of Static Hysteresis Curves by a PWL Ladder Circuit: M. Storace and M. Parodi 167

Robust Simultaneous Amplitude and Phase Approximations Orientated to Bandpass Wave Digital Lattice Filters: M. Yaseen 179

The Stability of Quadratic Filters: K. K. Johnson and I. W. Sandberg 191

On a Class on N-th Order Digital Filters Operating Outside the Region of Stability: C. D. Mitrovski, L. M. Kocarev and N. Jonoska 199

On the Resistive Function Measured Between Two Points on a Grid or a Lattice of Similar Nonlinear Resistors: E. Gluskin 207

A Cautionary Note on Stability of Current Conveyor Based Circuits: R. Cabeza and A. Carlosena 215

Issue No. 3, May–June 1998

Qualitative Analysis of Bi-directional Associative Memory *with Time Delay*: X. Liao and J. Yu . 219

Heteroassociative Memories via Cellular Neural Networks: M. Brucoli, L. Carnimeo and G. Grassi 231

Separation Conditions and Criteria for Uniform Approximation of Input-output Maps: I. W. Sandberg 243

Direct Analysis and Synthesis of Multiphase Switched-current Networks using Signal-flow Graphs: M. Helfenstein, A. Muralt and G. S. Moschytz 253

LETTERS TO THE EDITOR

What Form of Control Function Can Drive a Discontinuous-mode Boost Converter to Chaos Via Period-doubling?: W. C. Y. Chan and C. K. Tse 281

Characteristic Polynomial and Zero Polynomial with the Cochrun-Grabel Method: P. Andreani and S. Mattisson 287

Harmonic Distortion in Nonlinear Amplifiers with Nonlinear Feedback: G. Palumbo and S. Pennisi 293

A Novel Switched-current Sinusoidal Oscillator: X. D. Jia, G. F. Niu and R. M. M. Chen . . . 301

A Reconfigurable Analog VLSI Neural Network Architecture with Non-linear Synapses: G. M. Bo, D. D. Caviglia, M. Valle, R. Stratta and E. Trucco 307

On Simple Computation for Differential-algebraic Problems with Impasse Points: Y. Ren . . . 317

A Novel Fully Adjustable CMOS Current Schmitt Trigger with a 1.5 v Power Supply: G. Palumbo 323

Issue No. 4, July–August 1998

A Dual Rail Circuits Synthesis Environment for the Implementation of Multiple Output Boolean Functions: T. Karoubalis, G. Ph. Alexiou and N. Kanopoulos 329

Estimating Optical Flow with Cellular Neural Networks: B. E. Shi, T. Roska and L. O. Chua . . 343

A Rigorous Design Method for Binary Cellular Neural Networks: I. Fajfar, F. Bratkovic, T. Tuma and J. Puhan 365

CNN-based Difference-controlled Adaptive Nonlinear Image Filters: C. Rekeczky, T. Roska and A. Ushida 375

LETTER TO THE EDITOR

The Convex Stability of an Interval System: S. W. Ng 425

Issue No. 5, September–October 1998

Current Mode CCII Oscillators Using Grounded Capacitors and Resistors: A. M. Soliman . . . 431

Diagnosability Analysis of Analogue Circuits: W.-H. Huang and C.-L. Wey 439

Iterative Design of Two-Channel IIR Perfect Construction QMG Filters: N. A. El-Gayed, M. Abdel-Rahman and M. F. Fahmy 453

Computational Synthesis of Arbitrary Floating Impedances: R. Cabeza and A. Carlosena . . . 463

Circuit Realization of Markov Random Fields for Analog Image Processing: M. Parodi, M. Storace and C. Regazzoni 477

Design of IIR Multiple Notch Filters: Y. V. Joshi and S. C. Dutta Roy 499

LETTERS TO THE EDITOR

On a Specific Substitution Theorem: A. M. Sommariva 509

Variable Taylor Realisation and Improved Approximation of FIR Fractional Delay Systems: S. Samadi and H. Iwakura 513

Efficient Go No-Go Test of Active RC Filters: M. S. Zarnik, F. Novak and S. Maček 523

Improvement of the Sign Test for Finding all the DC Solutions of Piecewise-linear Circuits: M. Tadeusiewicz, M. Jagocki and S. Halgas 531

An Efficient Design Method of Cosine-modulated QMF Banks Satisfying PR Property: Y. Tan and Z. He 539

Issue No. 6, November–December 1998

Special Issue:

Theory, Design and Applications of Cellular Neural Networks: Part I: Theory

PART II CONTENTS 547

GUEST EDITORIAL
T. Roska, A. Rodriguez-Vazquez and J. Vandewalle 549

THEORY
Implementation of Large-neighbourhood Non-linear Templates on the CNN Universal Machine: L. Kék and A. Zarándy 551

A Unified Framework for Multilayer High Order CNN: S. Majorana and L. O. Chua 567

Implementation of Arbitrary Boolean Functions on the CNN Universal Machine: L. Nemes, L. O. Chua and T. Roska 593

Invertible Operations on a Cellular Neural Network Universal Machine: M. Csapodi, J. Vandewalle and T. Roska 611

A CNN Based Experimental Frame for Patterns and Autowaves: P. Arena, M. Branciforte and L. Fortuna 635
